PROFILE

As an Industrial Electrical Engineering and national champion cross-country athlete at the Pontifical Catholic University of Chile, I apply the same drive and discipline to my main purpose: supporting Chile's most vulnerable communities. This mission is most evident in my passion for education and mentoring. I founded the YouTube channel "PSU Diego" to make learning accessible for the Higher Education Entrance Exam, collaborated with various educational organizations, mentored three generations of engineering students and now I am a teacher with Enseña *Chile*. To complement this hands-on work, I also applied my technical skills in a demanding environment, seeking excellence during my internship at the Central Bank of Chile.
Ultimately, everything I do comes from my purpose. It has driven me to cultivate discipline, build resilience, and strive for excellence in all pursuits. I am committed to using these skills to help build a more equitable Chile.
